This archive is used to store and share information on a range of topics. Anyone can submit a grid for review. Once a submitted grid is checked by several contributors who have already added a certain number of approved grids. When your grid is accepted into the archive, you receive a set amount of points for your contribution. This grid is 256x256 blocks and contains a short summary of the subject. Larger grids provide more detailed information.The archive currently uses four grid sizes: 256x256, 512x512, 1024x1024, and 16384×16384 pixels, each containing increasingly in-depth information about the topic.

Here will be a overview for what is is placed in the grid. Just so i can send this to you sooner i going to type some text some text some text
